

# Jamiraquai Mikhail F. Alvarez

<https://github.com/moonbamijam>

A Bachelor of Science in Information Technology (BSIT) student that is passionate on doing things related to programming and games. I usually do things alone especially when things get even more challenging as I tend to take these things as an opportunity for me to learn more. But, whenever I really need a helping hand, I do not hesitate to ask for help since it will also help me to learn as well grow as a person.

---
